FOR IMMEDIATE RELEASE
9 A.M. EDT, April 21, 2009

(Saginaw, Michigan) MiCTA, one of the nation's largest products and services price aggregators for government and non-profit groups has awarded a new contract to Howard Technology Solutions. Howard has achieved the Endorsed vendor status, the highest MiCTA contract award classification, for Video Integration and related services.

A committee of MiCTA members from several states selected Howard Technology Solutions as an Endorsed vendor after a rigorous and highly competitive request for proposal (RFP) process and evaluation. The resulting Master Service Agreement between Howard and MiCTA simplifies the procurement process for MiCTA members who are seeking Video Integration Services. John Sundstrom, President of MiCTA said, "I am pleased to welcome Howard Technology Solutions as an Endorsed vendor of Video Integration Services. From a complete selection of video-conferencing equipment and professional services to maintenance and technical support services, Howard provides its customers with tailored solutions to satisfy any visual communications needs. A/V & Instructional Technology Manager, Andrew Howard, said, "MiCTA really helps schools and governmental agencies become more productive, and more cost-effective at the same time. And, we're proud to be a part of that effort."

Howard Technology Solutions, founded in 1998, is a division of Howard Industries Inc., a billion-dollar, privately-held corporation headquartered in Ellisville, Mississippi, with over 190,000 different product offerings ranging from video conferencing equipment and services to desktops, notebooks, servers, printers, digital cameras, and accessories.

MiCTA is a non-profit organization, formed in 1982. For more information on MiCTA, visit the website at www.mictatech.org, or e-mail micta@mictatech.org, or call MiCTA 1-888-964-2227.
