

Move your phone system to the cloud.

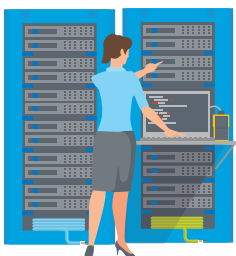

You rely on your phone system to stay connected to the your community and your employees. Don't settle for a phone system that only delivers dial tone. Jive Voice provides powerful phone system features built to improve all of your communications.

- **Global solution.** Unify multiple, dispersed locations and remote employees and provides callers with a single, seamless experience.
- **Find me / follow me.** Allow clients to reach you wherever you are with a customized dial plan that automatically routes calls from your office phone to any other phone.
- **Virtual receptionist.** Create schedule-based call routing, program unlimited auto attendants, and record and upload customized greetings, music, and messages.
- **Unified communications.** Access a full suite of unified features that include voicemail to email, mobility apps, web-based dashboards, and chat and SMS capabilities.
- **Contact center.** Create custom call flows to direct callers to exactly the right person. Monitor and improve call handling with detailed call reporting.

Stop overpaying for phone service.

Through your membership in **MiCTA**, you can easily upgrade your existing solution to Jive Voice at a fraction of the cost and without the administrative overhead of going out to bid.
